

Cut, Pull and Plate Package

Make Road Milling and Paving Quicker & Easier

Our Cut, Pull, and Plate Package allows you to replace manhole frames temporarily with a steel plate then mill and pave right over them. Don't let manholes slow down your milling and paving operation. Keep your crew working at top efficiency with the Cut, Pull, and Plate Package.

Designed specifically to make paving quicker and easier, this package allows you to Mill and pave right over manholes and then restore them at a later date.

Cut, Pull and Plate Package

Part # K-MM0559

THE PROCESS

- ✓ *Cut and remove the manhole frame from the road using the Six Shooter manhole cutter.*
- ✓ *Replace the frame and lid with a custom steel plate.*
- ✓ *Cover the steel plate with asphalt.*
- ✓ *Mill and pave with no obstructions.*
- ✓ *Use the Newcon Auger to quickly expose the center key shaped hole.*
- ✓ *Cut through the new asphalt with the Six Shooter manhole cutter and remove the steel plate and all road materials with no labor.*
- ✓ *Restore the manhole to grade.*
